PROFILE

Artificial Intelligence & Machine Learning undergraduate currently in 4th Semester at BMS College of Engineering with strong interest in programming, automation, and emerging technologies. Actively building practical projects to strengthen understanding of Python, databases, and core computer science concepts. Seeking internship opportunities to gain real-world technical experience.

EDUCATION

B.E. in Artificial Intelligence & Machine Learning – BMS College of Engineering, Bengaluru (2028) | CGPA: 7.8/10
Pre-University (12th Grade): 92%

TECHNICAL SKILLS

- Programming: Python (Intermediate), C, C++, Java (Beginner)
- Libraries: NumPy, Pandas, Matplotlib
- Databases: MySQL, MongoDB
- Core: OOP, Data Structures, Database Design
- Basic Machine Learning & Probability Concepts

PROJECTS

- **Virtual Assistant (Python):** Designed and developed a command-driven virtual assistant capable of executing system-level tasks such as opening applications, file handling, web searches, and automation processes using modular Python code.
- **Scam Filtration System:** Built a rule-based scam detection system to identify suspicious patterns in text messages using logical filtering, keyword analysis, and structured conditional logic.
- **Cinema Seat Booking Database System:** Developed a database-backed reservation system using MySQL/MongoDB with CRUD operations, relational schema design, and efficient query handling.

LANGUAGES

English (Professional) | Kannada (Native) | Hindi (Working Proficiency)

SOFT SKILLS

Analytical Thinking • Problem Solving • Quick Learner • Communication • Team Collaboration
